

**FOR IMMEDIATE RELEASE**

## **Voice1Direct Signs MOU with Global Telecommunications Vendor, Huawei Technologies Australia**

**OREGON, WASHINGTON, TEXAS, USA & SYDNEY AUSTRALIA** June 8, 2011 - Voice1Direct Ltd ((VOD.F) (<http://www.boerse-frankfurt.de>) Voice1Direct and Huawei Technologies Australia have signed a Memorandum of Understanding (MOU) that lays out the terms and conditions on which both companies will establish a strategic partnership allowing V1D to deploy Huawei's mobile network infrastructure in combination with V1D's patented WiMAX/WIFI MIMO technologies, enabling a complete range of mobile voice, and wireless broadband data services to V1D's wholesale and retail customers in Australia. Under the formal strategic partnership agreement, V1D and Huawei will also identify and work together on other potential telecoms projects, as being undertaken by V1D locally in Australia and globally.

Partnering with this global telecommunications vendor, V1D will deploy core, BSS/OSS, GSM-LTE Radio and Backhaul Transmission infrastructure in Australia, providing a turnkey mobile network using its proven and local market experience, which V1D recognizes as key to its success for expansion into Australia. The unique ability for V1D to package mobile "roaming" services as well as its own wireless fixed and mobile broadband services, using both licensed and/or unlicensed spectrum gives V1D a clear competitive and market advantage over mobile and fixed carrier networks in Australia today.

The strategic partnership arrangement could be further enhanced by upcoming opportunities to be involved in mobile telecommunications projects currently open for tender. V1D and Huawei are actively pursuing a range of such opportunities, which would see Huawei supply equipment, project design, engineering, integration, implementation and operational support services.

### **About Voice1Direct**

Voice1 Direct is a global wholesale and retail service provider, building cost effective end-to-end wireless networks - with high quality broadband service capability, including higher speeds & better coverage. With many years industry experience and knowledge in delivering 'last mile' wireless access, improved speeds and coverage is a result of patented 'SMART' Antenna adaptive concepts, giving V1D a clear competitive and market advantage over mobile and fixed carrier networks today. V1D received a full Carriers License in December 2010 in Australia

to operate its telecommunication services. The License gives it the authority to operate Wireless Networks in unlicensed spectrum, fiber optics and over the counter Licensed Spectrum where applicable and obtainable. V1D's existing Wireless Network footprint now exceeds 5000 sq. miles across Oregon, Washington & Texas, USA with growing rural and metro market share. V1D is currently implementing a Strategic Growth Plan (SGP) worldwide, via partner & capital investment programs, allowing the expansion of our wireless infrastructure and services into Papua New Guinea, Africa & Russia.

## **About Huawei**

Huawei is a leading telecoms solutions provider serving 45 of the world's top 50 telecom operators. In Australia, Huawei employs more than 400 staff and works with all major Australian operators – 50% of Australians already use some sort of Huawei product for their telecommunications needs. Huawei's products and solutions have been deployed in over 100 countries and support the communications needs of one third of the world's population.
