

FOR IMMEDIATE RELEASE

Voice1Direct and Huawei Work Together on Substantial Australian State Government Tender

OREGON, WASHINGTON, TEXAS, USA & SYDNEY AUSTRALIA July 29, 2011 - Voice1Direct Ltd (VOD.F) (<http://www.boerse-frankfurt.de>) and (<http://www.boerse-berlin.com>) Huawei Technologies Australia have worked closely together to prepare a formal Tender submission for the Western Australian Government's *Regional Mobile Communications Project*.

This WA Government's *RMCP* focuses on delivering and improving mobile voice telecommunications and wireless broadband service coverage across Western Australia's remote regions, highways and mobile black spot areas. Under a 10 year plus 5 year, build operate and maintain model, Phase 1 starting 2011/12 is valued at \$39.2 million of which the project is to build and operate a wireless service for mobile broadband, mobile phone and emergency broadband services using permanent and mobile tower type technology – a perfect scenario for Voice1Direct's WiMix network capability.

"This Tender opportunity was an ideal situation to see how both companies would work together under some pressure to meet a specific project deliverable and deadline", stated Voice1Direct's CEO Philip Walls. "Huawei was able to show the utmost professionalism in assisting us to put together a complete end-to-end broadband and mobile network offering, and by integrating V1D's unique WiMix technology, we are now in a position to deploy and offer both High Speed Internet and VoIP services to wholesale and retail customers in WA", Walls continues.

Both Companies are working towards implementing a Strategic Partnership having signed a Memorandum of Understanding (MoU) in June 2011, where Huawei will be the preferred Network Integration Partner to Voice1Direct to supply equipment, project design, engineering, integration, implementation and operational support services for this RMCP Project if V1D is the successful respondent and awarded the tender. Under a formal arrangement, V1D and Huawei will also work together on other potential telecoms projects, as being undertaken by V1D locally in Australia and globally.

About Voice1Direct

Voice1 Direct is a global wholesale and retail service provider, building cost effective end-to-end wireless networks - with high quality broadband service capability, including higher speeds & better coverage. With many years industry experience and knowledge in delivering 'last mile' wireless access, improved speeds and coverage is a result of patented 'SMART' Antenna adaptive concepts,

giving V1D a clear competitive and market advantage over mobile and fixed carrier networks today. V1D received a full Carriers License in December 2010 in Australia to operate its telecommunication services. The License gives it the authority to operate Wireless Networks in unlicensed spectrum, fiber optics and over the counter Licensed Spectrum where applicable and obtainable. V1D's existing Wireless Network footprint now exceeds 5000 sq. miles across Oregon, Washington & Texas, USA with growing rural and metro market share. V1D is currently implementing a Strategic Growth Plan (SGP) worldwide, via partner & capital investment programs, allowing the expansion of our wireless infrastructure and services into Papua New Guinea, Africa & Russia.

About Huawei

Huawei is a leading telecoms solutions provider serving 45 of the world's top 50 telecom operators. In Australia, Huawei employs more than 400 staff and works with all major Australian operators – 50% of Australians already use some sort of Huawei product for their telecommunications needs. Huawei's products and solutions have been deployed in over 100 countries and support the communications needs of one third of the world's population.
